flow-med

Your specialist for the design, development, manufacture, marketing and distribution of electronic medical devices.

All flow-med dry and hygiene products meet the high requirements for medical devices (Class I) of the Medical Device Regulation (EU) 2017/745.

flow-med products are medical devices.

Germs, bacteria and fungi are everywhere. The earpiece in the ear poses particular risks of ear infection.

flow-med products offer clinical cleanliness and optimum hygiene.

Product, color design, logos and packaging are tailored to your corporate identity.

flow-med private label products open up new sales opportunities and strengthen customer loyalty.

From design and production to use, we pay strict attention to environmental compatibility, low energy consumption and maximum product safety.

flow-med products are energy balance-optimized, without chemical-toxic additives, are value-preserving, hygiene-preventive and safe.

Products for wellbeing

In addition to **MEDICAL DEVICES** and **CLEAN&CARE**, **WELLBEING** is a new business area and an extension of the flow-med sales portfolio.

Hearing care is an attractive business segment. However, the globalization of markets, direct manufacturer sales, Internet sales, OTC... will require additional attractive sales products in the future. Cross-selling (expansion) and up-selling (enhancement) with attractive additional sales are the magic formula. Professional expertise, personal advice, service and a large customer base are the assets of the hearing care professional.

Many people in this target group are receptive to preventive, additional and supplementary products with high benefits that make their everyday lives easier and improve their wellbeing. They have above-average financial strength, are consumer-friendly and quality-conscious, loyal and at the same time grateful.

This is a growth market and exciting capital. Generate an additional business segment with flow-med products for wellbeing.
