- **Promotes sleep**
- **Integrated rechargeable battery and USB-C**
- **Perfumed with OilScent aroma oils**
- **Easy operation by sensor buttons**

Your specialist

LumoScent
Aroma humidifier and
warm sleep light

LumoScent

Aroma humidifier

The aroma humidifier creates a microfine water atomization through ultrasound.

The effective combination with therapeutic aroma oils has, depending on the essential oils used, a sleep-promoting, relaxing, energy-building effect or simply provides a pleasant room perfuming.

LumoScent

Warm sleep light

Poor sleep is the number one common disease. The special sleep light, together with healthy lifestyle and good sleep hygiene, can help to significantly improve your quality of life and wellbeing.

The specially developed light with 5 LEDs (2,000 Kelvin) promote the body's own melatonin output and thus facilitate falling asleep. The lamp is adjustable in three brightness levels. The subtle, warm white hue is scientifically proven to promote sleep and also provides a pleasant atmosphere.
