

The **LumoScent** aroma humidifier with integrated, dimmable sleep light promote a pleasant bedroom climate.

In addition, the **SleepSense** set consisting of a sleep mask and earplugs can further improve sleep quality.

After all, darkness and quiet are important for falling asleep, sleeping through the night and, above all, for a healthy deep sleep phase.

Especially for people with sleep disorders, shift workers, naps, travelers, but also for wellness applications, the darkening by the sleep mask and the quietness by the earplugs are a beneficial addition.

Your specialist

SleepSense
for a peaceful sleep

SleepMask

**Sleep promoting darkening
for the eyes**

Sleep mask is made of light, airy and high quality Mulberry silk (16 momm). It keeps the light away from the eye and signals the brain night, which leads to the release of sleep hormone melatonin. The sleep mask is made of allergy-free silk with a cooling effect, has a comfortable pressure-free fastening and is hand washable. It is accurate in size and shape, pleasant to the skin and comfortable. In the set is one sleep mask for a pleasant sleep and soothing relaxation.

SleepPlugs

**Sleep promoting rest
for the ears**

Disturbing noise significantly impedes falling asleep. Not always ambient noise in the sleeping area can be sufficiently reduced. The earplugs reduce the noise level by over 30dB and create the desired peace for a good night's sleep. The sleep protector is made of hypoallergenic silicone and has three super-soft sealing lamellae. Properly inserted into the ear canal, it is hardly noticeable, even when you sleep on it. In the set is one pair of earplugs for a peaceful sleep, wellness applications, while traveling and even for bathing.
