

## The new dry-turbo cd 2<sup>®</sup> is a good choice

The patented dry-turbo cd 2<sup>®</sup> as a cap offers fast drying.

Easy handling by touch on a single button, everything is handled by micro-processor fully automatic.

Whether at home or on the move, the device works on a 5V-USB-basis and can be used in hotels, cars, PCs, TVs or audio devices. A standard USB 2.0 port is sufficient for this.

The new dry-turbo cd 2<sup>®</sup> is energy-saving, cost-effective in operation and offers safety in application. Effective and fast care is the best guarantee for a long hearing aid life.

# dry-turbo cd 2<sup>®</sup>

Mini drying cap  
for all hearing aids.

Your specialist

- Perfect fast drying by ventilator
- UV light with antimicrobial effect
- Hygiene-Pad<sup>®</sup> for medical care

## Turbo-drying by ventilator

Moisture, body secretions and cerumen can severely impair the function of hearing aids and lead to failure.

The new dry-turbo cd 2<sup>®</sup> offers optimum care.

Fast drying by an efficient air blower extends the service life significantly and reduces repairs.

Additional LED UV-light (450 nm) has an antimicrobial effect.

Turbo-drying  
by efficient  
air flow blower

UV light with  
antimicrobial  
effect
